Unusual number of ball and roller bearings used in the new Ford

\$641.50 Delivered---

Fully Equipped

used at every point in the new Ford where they will contribute to smooth operation and long life.

Spiral roller bearings, for instance, are used in the rear hub and on the drive shaft at the universal joint. Taper roller bearings are used in the front wheels. Steering is easier because of the roller thrust bearings used on the spindle bolts.

A ball thrust bearing is used for disengaging the clutch and the front end of the clutch shaft is carried in a radial ball bearing in the flywheel. Another reason for the ease of shifts ing gears in the new Ford is the use of ball and roller bearings in the transmission.

Throughout the new Ford you find this same quality and careful attention to every detail that contributes to good performance. In the words of the experienced mechanic, "the new Ford is a sweet mechanical job."

New Low Ford Prices:

> A new world comes into being at Christmas Time

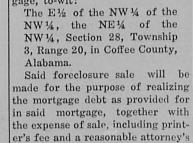

Since the Night that the Star of Bethlehem guided the Three Wise Men to the Manger, Light has always been the most effective outward expression of the Christmas spirit.

And the custom of "letting light carry your Christmas greetings" is growing apace. It makes for a world of magic beauty . . . of nights alive with glowing color ... where every house on every corner is radiant with Christmas light, Christmas cheer.

Light and cheer . . . cheer and light -they go together. And it has unlimited possibilities for beauty. Outdoor Christmas trees, colorful lights at door and window, outdoor decorative lighting of every description . . . there's beauty and cheer in Christmas lights, no mat-

ter where you put them. May we help you with suggestions for Outdoor Christmas lighting effects for your home?

Done this, the 17th day of Deember, 1929. T. S. FAULK & COM-PANY, Mortgagee. W. M. Brunson, At-
